

Paint Chip Trees

What you will need:

- Paint chips (I used green, but other colors would be lovely, too!)
- Ruler
- Scissors
- Hole punch
- Ribbon
- Jewels, stickers, etc.
- Tacky glue

Directions:

To make large trees, use ruler to measure the halfway point across the top of the paint chip and mark. Draw lines from that point to each of the bottom corners and cut.

To make smaller trees, draw a diagonal line from a top corner to the opposite bottom corner. Cut into two pieces. Even out the bottoms of the shapes by drawing a line across and cutting.

Punch a hole in the top of each tree, loop a piece of ribbon through, and tie.

If desired, decorate the trees with jewels, stickers, etc. Let dry completely before hanging.
